- Project Title: insurance policy management and premium reminder system
- Course: C Programming Lab / Mini Project
- Student Name & Roll No: [Enter details]
- Department: Computer Science
- Mentor / Guide: [Name & Designation]

TECHNICAL TEAM

KG COLLEGE OF ARTS AND SCIENCE

C Programming
Project Presentation

Introduction

- Insurance management is essential for tracking policies and payments
- Manual systems are time-consuming and error-prone

This system automates:

Policy management

Premium tracking

Reminder notifications

TECHNICAL TEAM

KG COLLEGE OF ARTS AND SCIENCE

C Programming
Project Presentation

Objective

~To develop a system using Java

~To manage customer and policy details efficiently

~To send reminders before premium due dates

~To reduce manual errors

TECHNICAL TEAM

KG COLLEGE OF ARTS AND SCIENCE

C Programming
Project Presentation

Problem Statement

~Difficulty in tracking multiple policies

~Missed premium payments

~Lack of automated reminder systems

~Inefficient manual record keeping

TECHNICAL TEAM

C Programming
Project Presentation

System Requirements

Processor: Intel i5 or higher (recommended for better performance)

RAM: 8 GB (recommended for database operations)

Storage: SSD preferred for faster data access

Network: Optional (required for email/SMS reminders)

Backup Device: External storage for data backup

TECHNICAL TEAM

KG COLLEGE OF ARTS AND SCIENCE

C Programming
Project Presentation

System Design

The system follows a modular design approach

Built using Java with OOP concepts

Divided into:

Presentation Layer (UI)

Business Logic Layer

Data Access Layer

TECHNICAL TEAM

KG COLLEGE OF ARTS AND SCIENCE

C Programming
Project Presentation

Module Description

User Management Module:

~Handles user registration and login

~Maintains user credentials (username, password)

~Provides authentication and access control

~Supports roles (Admin/User)

Purpose: Ensures secure access to the system

TECHNICAL TEAM

C Programming
Project Presentation

Algorithm / Flowchart

Start
Fetch all policies
Get current date
For each policy:
Calculate difference between due date and current date
If difference ≤ 5 days:
Display reminder message
End loop
Stop

Start
↓
Menu
↓
User Choice
↓
[Decision]
/ | \
Add Pay Reminder
| | |
Save Update Check Date
↓ ↓ ↓
← Back to Menu →
↓
End

TECHNICAL TEAM

C Programming
Project Presentation

Implementation

Developed using Java (OOP concepts)

Classes: Customer, Policy, Premium

Menu-driven system

File handling / database (optional)

Reminder using date comparison

TECHNICAL TEAM

C Programming
Project Presentation

Output Screens

~Login screen for user authentication

~Main menu with options (Add, View, Update, Delete)

~Add policy screen for entering details

~View policy screen to display records

~Update/Delete screen for modifying data

~Premium reminder alert for due/overdue payments

TECHNICAL TEAM

KG COLLEGE OF ARTS AND SCIENCE

C Programming
Project Presentation

Results & Discussion

- System successfully manages insurance policy data
- Reduces manual errors in tracking policies
- Ensures timely premium payment reminders
- Improves efficiency and accuracy
- User-friendly and easy to operate
- Can handle multiple customer records

Limitation:

- Basic version may not support real-time notifications (SMS/Email)

TECHNICAL TEAM

KG COLLEGE OF ARTS AND SCIENCE

C Programming
Project Presentation

Conclusion & Future Enhancement

~The system provides an efficient solution for managing insurance policies

~Helps users avoid missing premium payments

~Demonstrates practical use of Java and OOP concepts

~Suitable for small-scale insurance management systems

References / Acknowledgement

Reference:

- Java Programming textbooks
- Online tutorials (GeeksforGeeks,
- TutorialsPoint)
- Official Java documentation (Oracle)

College notes and materials

Acknowledgement:

- Thanks to our project guide for guidance
- Gratitude to faculty members for support

Thanks to friends/classmates for help

Special thanks to institution for resources

Thank You

- Provides efficient policy management
- Ensures timely premium reminders
- Reduces manual work and errors
- User-friendly and easy to use
- Demonstrates Java and OOP concepts
- Useful for small-scale applications
